

HIMARS®

Precision Firepower, Unmatched Reliability

HIMARS

OFFENSIVE PROTECTION

Defeating or deterring advanced threats to protect warfighters, citizens and infrastructure is becoming more challenging.

The Lockheed Martin HIMARS provides advanced tactical missile capabilities supporting homeland defense operations, contributing to regional security/stability and allowing for expeditionary deployments to deter, defeat or neutralize advancing threats.

PRECISION FIRES CAPABILITY

Able to deploy rapidly anywhere in the world, HIMARS delivers versatile, accurate, precision-strike munitions ranging from 15 to 499+km.

HIMARS carries a six-pack of GMLRS® or ER GMLRS rockets, two Precision Strike Missiles (PrSM) or one Army Tactical Missile System (ATACMS) missile, and can be configured to launch other variant munitions. The latest fire control system provides cutting-edge technology to the user for the most up-to-date firing solutions. HIMARS has the capability to receive variable message format of C4ISR data in order to precisely target and eliminate threats.

PROVEN PARTNERSHIP

Lockheed Martin has built and delivered HIMARS systems that routinely support conventional and special operations forces around the globe.

Under a new international industrial cooperation approach, Lockheed Martin can partner to integrate the HIMARS sophisticated Launcher Loader Module and Fire Control System onto a customer-provided truck chassis. Providing industrial cooperation opportunities for future HIMARS customers is a key business imperative that offers both indigenous technology/knowledge transfer and long-term partnerships.

RELEVANT

HIMARS is combat-proven, highly accurate and reliable, and provides users with a shoot-and-scoot firing capability to position, engage and rapidly relocate. Combined with its C-130 transportability, HIMARS offers enhanced survivability and is a strategically mobile precision fires platform.

With more than 550 launchers in service worldwide and 2+ million operating hours with the U.S. fleet, HIMARS has become synonymous with quality and reliability.

SPECIFICATIONS

LENGTH: 7.8 m (25 ft 6 in)
WIDTH: 2.4 m (8 ft 1 in)
HEIGHT: Stowed - 2.9 m (9 ft 7 in)
Full Elevation - 5.7 m (18 ft 4 in)
WEIGHT: Empty (No Appliqué) - 13,154 kg (29,000 lb)
Combat Loaded - 16,283 kg (35,800 lb)

FEATURES

- Homeland Defense/Border Security/Attack Operations
- Regional Interoperability/Force Projection/Expeditionary
- C-130 transportable (combat loaded)
- Three-man crew
- Early entry fire support for heavy and light forces
- Rapid emplacement and quick reload enhance survivability in high threat environments
- Long-range precision fires capability against a multitude of target sets
- Integrated C2 that fires GMLRS, PrSM and ATACMS munitions
